

Bibliographie sur
Zonocerus variegatus Linné, 1758
(Orthoptera Caelifera Pyrgomorphidae)

Édition Septembre 2017

CHIFFAUD-MESTRE J. & MESTRE J.

Cette bibliographie est une mise à jour de celle de notre ancien document consacré à *Zonocerus variegatus* (cf. ci-après Chiffaud & Mestre, 1990).

Au-delà de la faunistique et la bio-écologie, thèmes principaux de notre recensement, nous avons élargi l'inventaire des publications à d'autres thèmes mais cependant sans prétention d'exhaustivité. Il s'agit en particulier d'études de physiologie, de biochimie ou traitant de

l'utilisation alimentaire du Criquet puant. Nombre d'entre elles proviennent du Nigeria où le Criquet puant est devenu un modèle d'étude en laboratoire à l'instar du Criquet migrateur et le Criquet pèlerin.

Comme dans notre précédente bibliographie, les publications concernant les méthodes de lutte contre les acridiens, chimique ou non, ainsi que les inventaires de ravageurs des diverses cultures ne sont que partiellement recensées.
